## **Session 112: Reach out because we will not interfere**

### **Summary:**

Our function in relation to this channel is to assess and to give suggestions as to how she may obtain a particular goal where she has requested and which reach us to such energies sources.

There are agreements between energies (aspects) and then we can contact this entity. Through this penetration we are allowed to tap into it and to communicate. This will flow from this channel and using your way of thinking penetrating to the energies, reflecting to us then we can communicate.

When we channel or pass the information, we pass it and we keep the agreements, through the flow the concepts and not interfering in the realm of energies unless there is a request from the individual.

The communication must focus the energies and penetrate and then and we can communicate directly with the individual. We do not select an individual in the earth plane and direct the energy to that individual. It is individual who must direct his attention and energy to us for communication. If not we are interfering.

This form of communication (channeling) with earth energies (aspects) is allowed because it is not interference. The individual reach out beyond these energies. The aspects residing in this channel can give you the answer. Although this channel is not completely clear. Power of suggestion is very active on this earth plane and comes into play. It gains its power from a believe structure of the source.

The information we pass still needs to be filter and accepted by the different aspects (Earth energies). It was the aspects that participated in the communication occurring between the channel and the sessions. The agreements of the Earth energies (aspects) their opposites create the manifestations.

Individuals can reach out and the Earth energies can't do anything about it and the earth energy are in contact with the creating force and reach out to the creative world. And these other energies exist in other realities. And when communication ceases the individual comes back to the earth energy.

If the attention becomes focus on the alleviation of other people, aspective problems, one becomes identify with the ability to solve these problems one can fall away of from keeping the attention set for oneself. Unless the objective is to do that particular phenomenon. Aspects can be trained in these areas and the consciousness attention given to this aspect and create this phenomenon.

Any information given to the earth energies (aspects) still live inside the opposites so this info will create a new stimulus for them to deal with and it is ok. This type of communication is proper.

What is speak of is general it is general information, and we don't deal with an individual himself. Each individual assimilates to his aspects the information provided and take on meanings that they themselves apply to it.

The info given has different meaning to different individuals. Each individual has a reality within the realm of its aspects and this information is received based on that degree of reality or level of reality.

45m51s tape is interrupted, no sound and restarts at 45m55s.

We cannot and will not tell this individual how to conduct their daily life about what she should eat or wear. This should be imposing a restriction to the what the individual is seeking, freedom, independence. And if she is to be become dependent on us to the point of not being able to make any decision without contacting us first she certainly indeed wont be a free person, she will be as imprisoned with us as she has been in the past imprisoned by her aspects.

You must focus your attention to the desire to truly know and that will being the purpose. It is a matter of purpose. You must reach out and we will see it and we will communicate it with you. Beyond the realm we are communicating with you know, verbally. We can not come to you other that verbally as we are doing now. But if you reach out, we will touch your light.
